General Statistics

This page provides a basic overview of the report. The Visits Over Time graph identifies the overall count of visits to your Web site. The General Statistics table provides statistics of the total activity for this Web site during the designated report period.

General Statistics	
Hits	
Successful Hits For Entire Site	119,852
Average Hits Per Day	3,866
Home Page Hits	299
Pages	
Page Views (Impressions)	28,493
Average Per Day	919
Dynamic Pages and Forms Views	763
Document Views	27,730
Visits	
Visits	10,981
Average Per Day	354
Average Visit Length	00:09:18
International Visits	3.87%
Visits of Unknown Origin	18.43%
Visits From Your Country: United States (US)	77.70%
Visitors	
Unique Visitors	6,259
Visitors Who Visited Once	5,235
Visitors Who Visited More Than Once	1,024

General Statistics - Help Card	
?	
Average Hits Per Day - Number of successful hits divided by the total number of days in the log file.	

General Statistics - Help Card

Average Page Views Per Day - Number of page views divided by the total number of days in the log file.

Average Visit Length - Average of all non-zero length visits in the reporting period. A zero-length visit occurs when all hits in that visit are logged with the exact same time stamp.

Average Visits Per Day - Number of visits divided by the total number of days in the log file.

Document Views - Number of hits to pages that are considered documents--not dynamic pages or forms--as defined by the system administrator.

Dynamic Pages and Forms Views - Number of hits to pages that are considered dynamic pages or forms. Reporting Center considers any URL containing options (with a question mark in the URL) a dynamic page. Any file with a POST command is considered a form.

Hits - Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

Home Page Hits - Number of times the home page (as defined in the profile) was viewed.

International Visits - Percentage of visitors who are defined as "international visitors" by the system administrator.

Page - Any document, dynamic page, or form. Different types of profiles have different default settings for which file extensions qualify a file as a document. These settings can be changed by the Reporting Center system administrator. Any URL containing a question mark is considered a dynamic page. Any file with a POST command is considered a form.

Page View (Impressions) - A hit to any file classified as a page. Contrast the value for "Page Views" with the value for "Successful Hits For Entire Site," which includes hits to files of every type.

Successful Hits For Entire Site - Number of successful hits including HTML pages, images, forms, scripts, and downloaded files.

Unique Visitors - The total number of unique visitors during the report period. A unique visitor is identified by their IP address, domain name, or cookie.

Visits - Number of visits to your site. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

Visits From Your Country - Percentage of visits from your country. The name of your country and the country code are shown. Your system administrator configures the selection for your country.

Visits of Unknown Origin - Percentage of visits where the visitor's domain name could not be determined or the country associated with the domain name could not be determined.

Visitors Who Visited More Than Once - Number of visitors who visited the site more than once during the reporting period.

Visitors Who Visited Once - Number of visitors who visited the site exactly once during the reporting period.

The General Statistics page provides an overview of your Web site's performance and visitor behavior, and can help you determine which chapters will be most valuable to you.

Page Views Over Time - Help Card

?

Page - Any document, dynamic page, or form. Different types of profiles have different default settings for which file extensions qualify a file as a document. These settings can be changed by the Reporting Center system administrator. Any URL containing a question mark is considered a dynamic page. Any file with a POST command is considered a form.

Page View - A hit to any file classified as a page. Contrast page views with hits, which counts files of every type.

Time Interval - A one-year report displays monthly time increments. A one-quarter report displays weekly time increments. A one-month report or a one-week report displays daily time increments. A daily report displays hourly time increments. All activity attributed to one time increment occurs between the listed increment and the beginning of the next one. An hour-long interval marked 12:00, for example, includes all activity between 12:00 and 12:59.

% - Percentage of total page views that occurred during the specified time interval.

💡

Periods of less activity can be considered good times for maintenance and content improvement.

Top Pages by Visits

This identifies the most popular Web pages on your site and shows you the number of visits for each, and displays the average length of time the page was viewed.

Top Pages by Visits				
	Pages	Visits	%	Avg Time Viewed

Top Pages by Visits - Help Card	
<p>?</p> <p>Avg Time Viewed - Average length of time the specified page was viewed.</p> <p>Pages - A document, dynamic page, or form. Different types of profiles have different default settings for which file extensions qualify a file as a document. These settings can be changed by the Reporting Center system administrator. Any URL containing a question mark is considered a dynamic page. Any file with a POST command is considered a form. If the page has a title, you will see the title of the page and the URL. Otherwise, you will see the URL and the words "Page Has No Title."</p> <p>Visits - Number of visits to this page. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.</p> <p>% - Percentage of the total visits in which the visitor viewed this page at least once.</p> <p>💡</p> <p>Pages with good content and design are more likely to attract visitors and be revisited. Less popular pages on a site can be made more appealing by improving the content or incorporating design elements similar to that on the more important pages. Always remember that people are far more interested in content than in design, and average view times can help determine which content is most important to your visitors.</p>	

Hits Over Time

This page helps you learn the bandwidth requirements of your site by tracking hits over the course of the report period.

Hits Over Time		
Time Interval	Hits	%
10/01	4,642	3.87%
10/02	5,299	4.42%
10/03	5,133	4.28%

10/23	5,954	4.97%
10/24	3,855	3.22%
10/25	3,173	2.65%
10/26	1,347	1.12%
10/27	1,575	1.31%
10/28	4,318	3.60%
10/29	5,455	4.55%

Hits Over Time		
Time Interval	Hits	%
10/30	5,535	4.62%
10/31	6,500	5.42%
Total	119,852	100.00%

Hits - Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

Time Interval - A one-year report displays monthly time increments. A one-quarter report displays weekly time increments. A one-month report or a one-week report displays daily time increments. A daily report displays hourly time increments. An hour-long interval marked 12:00, for example, includes all activity between 12:00 and 12:59.

% - Percentage of hits that occurred during the specified time interval.

Periods of less activity can be considered good times for maintenance and content improvement.

Visitors Over Time

This page shows how many times visitors visited your Web site and how long they stayed. The information is divided into time slices based on the duration of the log file. Visits are freshly counted during each time interval in the report. Some visits may span more than one time interval, and therefore a single visit may be counted more than once. This manner of counting visits may cause the Visits Over Time total visits to exceed the total visits shown on the General Statistics page.

Visitors Over Time

Time Interval	Visits	Unique Visitors	First Time Visitors	Avg Visit Length	Visitor Minutes
10/01	345	308	0	00:02:23	826.27

Total	10,998	9,422	0		36,352.03

Visitors Over Time - Help Card

Average - This row gives the average for each column. The Average row value for the Avg Visit Length column excludes zero-length visits, while the values in the column above include zero-length visits. At times the Average row value is noticeably larger than the Avg Visit Length values shown for the individual time intervals. A zero-length visit occurs when all hits in that visit are logged with the exact same time stamp.

Avg Visit Length - The average amount of time visitors spent at your site within the given time interval. The average visit length for each time interval includes all visits.

First Time Visitors - Number of visitors who had never visited your Web site before.

Time Interval - A one-year report displays monthly time increments. A one-quarter report displays weekly time increments. A one-month report or a one-week report displays daily time increments. A daily report displays hourly time increments. An hour-long interval marked 12:00, for example, includes all activity between 12:00 and 12:59.

Total - The total for the column. Some visits may span more than one time interval, and be counted more

Visitors Over Time - Help Card

than once. These duplicate visit counts may cause the total visits count on this row to exceed the actual total number of visits shown on the General Statistics page.

Unique Visitors - Number of individuals who visited your site during the report period. If someone visits more than once, they are counted only the first time they visit.

Visitor Minutes - Number of minutes your Web site was viewed, regardless of who was viewing it.

Visits - Number of visits to your Web site. Each visit by each visitor is counted, even if the visitor came to your Web site many times.

Use this page to determine which times your Web site is busiest.

Daily averages cut off visits that continue into the next day, whereas weekly averages do not. Therefore, weekly averages may appear a bit longer than daily averages.

Top Visitors

This page identifies the IP address, domain name, or cookie of each visitor, and identifies the visitor's relative activity level on the site. If you use cookies to track visits, Reporting Center can differentiate between hits from different visitors with the same IP address.

Top Visitors - Help Card

?

Top Visitors - Help Card

Visitor - The IP address, domain name, or cookie of the visitor.

Visits - Number of times the specified visitor visited your site. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of visits to your site by the specified visitor.

Consider the visitors who use the site most, and tailor your site to their interests and needs. If your site is an intranet, notice which employees use the site most, and find out what they like about it. You might also get feedback from those who use it the least and find out what they are looking for.

Note: If a visitor has a dynamic IP address, or if a group of visitors are behind a proxy server or firewall, this data might be misleading. In the case of a dynamic IP address, multiple IP addresses could be shown for a single visitor, and in the case of a firewall or proxy server, one IP address could be used by more than one visitor.

Top Referring Sites by Visits

This page identifies the domain names and IP addresses that refer visitors to your site. This information will be displayed only if your server is logging this information.

Top Referring Sites by Visits

Top Referring Sites by Visits - Help Card
?

Top Referring Sites by Visits - Help Card

Referring Site - A Web site which refers a visitor to your site by linking to it.

Site - Specific referring site being analyzed.

Visits - Number of times the specified site referred visitors to your site.

% - Percentage of referrals that came from the specified site.

You can use this page to determine which sites are referring the most visitors to your site. This can help when considering the most effective ways and places to attract visitors.

Top Browsers by Visits

This page identifies the most popular browsers used by visitors to your site. This information will only be displayed if your server is logging the browser/platform information.

Top Browsers by Visits			
	Browser	Visits	%

Top Browsers by Visits - Help Card
?

Top Browsers by Visits - Help Card

Browser - A program used to locate and view Web pages. These include Netscape, Mosaic, Microsoft Internet Explorer, and others.

Total - The total visits where there was sufficient information to identify the browser. This number may be less than the total visits overall.

Visits - Number of times a visitor with the specified browser came to your site. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of total visits by visitors using the specified browser.

Browser data can help you determine how to configure your site for optimal viewing.

Note: Any hits identified as originating from a spider (an automated program that searches the Internet) are not counted in this table. Also, if a browser does not identify itself in its request to the Web server, it will get counted on this page as an "Other."

Top Pages by Visits

This identifies the most popular Web pages on your site and shows you the number of visits for each, and displays the average length of time the page was viewed.

Top Entry Pages by Visits - Help Card

Entry Page - The first page viewed during a visit to your Web site. If a visit consists only of hits to non-page files, that visit has no entry page. This can cause the total number of entry pages to be less than the total number of visits.

Pages - Any document, dynamic page, or form. Different types of profiles have different default settings for which file extensions qualify a file as a document. These settings can be changed by the Reporting Center system administrator. Any URL containing a question mark is considered a dynamic page. Any file with a POST command is considered a form. If the page has a formal title, you will see the title of the page and the URL. Otherwise, you will see the URL and the words "Page Has No Title."

Visits - Number of visits where the specified page was the entry page. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of times this page was the entry page compared with other entry pages.

This information can indicate how you might want to optimize the architecture of your Web site based on where you visitors are entering. It can also help you determine which external links are most effective. Consider updating meta tags and links.

Top Entry Pages by Visits Over Time

This page identifies the first page viewed when a visitor visits your site. The most common entry page is usually the home page, but other common entry pages include specific URLs that visitors enter to go directly to a particular page.

Single Access Pages by Visits - Help Card

Single Access Page - A page on your Web site that visitors open, then exit from, without viewing any other page. To qualify, the visit must be to a page with a valid document type. If the visit is to a document with a different type (such as a graphic or sound file), the file does not count as a single access page, and the visit is not included in the total. Such visits are often the result of other sites referencing a specific downloadable file or graphic on your site. In these cases, a visit may have a single hit to a non-document type file, and will not be counted in the percentage calculations.

Pages - Any document, dynamic page, or form. Different types of profiles have different default settings for which file extensions qualify a file as a document. These settings can be changed by the Reporting Center system administrator. Any URL containing a question mark is considered a dynamic page. Any file with a POST command is considered a form. If the page has a formal title, you will see the title of the page as well as the URL. Otherwise, you will see the URL and the words "Page Has No Title."

Visits - Number of visits where the specified page was the exit page. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of times this page was a single access page compared with other single access pages.

This information can be helpful when considering the design of the site with respect to the kind of visitors you attract. Consider how well these pages convey your message. Do they need improvement to extend visits, or is it possible that are you attracting the wrong visitors?

Page - Any document, dynamic page, or form. Different types of profiles have different default settings for which file extensions qualify a file as a document. These settings can be changed by the Reporting Center system administrator. Any URL containing a question mark is considered a dynamic page. Any file with a POST command is considered a form.

Page View - A hit to any file classified as a page. Contrast page views with hits, which counts files of every type.

Time Interval - A one-year report displays monthly time increments. A one-quarter report displays weekly time increments. A one-month report or a one-week report displays daily time increments. A daily report displays hourly time increments. All activity attributed to one time increment occurs between the listed increment and the beginning of the next one. An hour-long interval marked 12:00, for example, includes all activity between 12:00 and 12:59.

% - Percentage of total page views that occurred during the specified time interval.

💡

Periods of less activity can be considered good times for maintenance and content improvement.

Hits Over Time

This page helps you learn the bandwidth requirements of your site by tracking hits over the course of the report period.

Top Visitors - Help Card

Visitor - The IP address, domain name, or cookie of the visitor.

Visits - Number of times the specified visitor visited your site. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of visits to your site by the specified visitor.

Consider the visitors who use the site most, and tailor your site to their interests and needs. If your site is an intranet, notice which employees use the site most, and find out what they like about it. You might also get feedback from those who use it the least and find out what they are looking for.

Note: If a visitor has a dynamic IP address, or if a group of visitors are behind a proxy server or firewall, this data might be misleading. In the case of a dynamic IP address, multiple IP addresses could be shown for a single visitor, and in the case of a firewall or proxy server, one IP address could be used by more than one visitor.

Top Visitors Over Time

This page identifies the IP address, domain name, or cookie of each of your most frequent visitors. It also shows the visitor's relative activity level on the site.

Top Visitors by Hits Over Time - Help Card

?

Hits - Number of hits attributed to the specified visitor. Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

Visitor - The IP address, domain name, or cookie of the visitor.

% - Percentage of total hits attributed to the specified visitor.

💡

Consider the visitors who use the site most, and tailor your site to their interests and needs. If your site is an intranet, notice which employees use the site the most and find out what they like about it. You might also get feedback from those who use it the least and find out what they are looking for.

Note: If you do not use WebTrends(R) cookies to track visits on your site, Reporting Center can not differentiate between hits from different visitors with the same IP address.

Top Visitors by Hits Over Time - Help Card

New vs. Returning Visitors

This page shows the number of first time and returning visitors to your site. Only visitors identified by cookies are counted.

New vs. Returning Visitors			
	New or Returning Visitor	Visits	%
1.	Visitors Without Cookies	10,981	100.00%
	Total	10,981	100.00%

New vs. Returning Visitors - Help Card

?

New Visitors - Visitors who didn't have a cookie from your site on their first hit, but had one on later hits.

Returning Visitors - Visitors who already had a cookie from your site when they visited.

Visitors Without Cookies - Visitors who came to your site with cookies disabled. There is no way to determine if these visitors are new or returning.

Visits - Number of visits by visitors who fit into the specified visitor category. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of visitors who fit into the specified visitor category.

💡

By tracking the ratio between new and returning visitors over a period of time, you can determine if your site is attracting enough returning visitors.

Note: If the data shows all visitors did not have cookies, it is likely the Reporting Center has not been configured to perform this analysis. Contact the system administrator to see if this feature has been enabled.

Visitors Over Time

This page shows how many times visitors visited your Web site and how long they stayed. The information is divided into time slices based on the duration of the log file. Visits are freshly counted during each time interval in the report. Some visits may span more than one time interval, and therefore a single visit may be counted more than once. This manner of counting visits may cause the Visits Over Time total visits to exceed the total visits shown on the General Statistics page.

Visitors Over Time

Time Interval	Visits	Unique Visitors	First Time Visitors	Avg Visit Length	Visitor Minutes
10/01	345	308	0	00:02:23	826.27

Visitors Over Time - Help Card

Average - This row gives the average for each column. The Average row value for the Avg Visit Length column excludes zero-length visits, while the values in the column above include zero-length visits. At times the Average row value is noticeably larger than the Avg Visit Length values shown for the individual time intervals. A zero-length visit occurs when all hits in that visit are logged with the exact same time stamp.

Avg Visit Length - The average amount of time visitors spent at your site within the given time interval. The average visit length for each time interval includes all visits.

First Time Visitors - Number of visitors who had never visited your Web site before.

Time Interval - A one-year report displays monthly time increments. A one-quarter report displays weekly time increments. A one-month report or a one-week report displays daily time increments. A daily report displays hourly time increments. An hour-long interval marked 12:00, for example, includes all activity between 12:00 and 12:59.

Total - The total for the column. Some visits may span more than one time interval, and be counted more

Visitors Over Time - Help Card

than once. These duplicate visit counts may cause the total visits count on this row to exceed the actual total number of visits shown on the General Statistics page.

Unique Visitors - Number of individuals who visited your site during the report period. If someone visits more than once, they are counted only the first time they visit.

Visitor Minutes - Number of minutes your Web site was viewed, regardless of who was viewing it.

Visits - Number of visits to your Web site. Each visit by each visitor is counted, even if the visitor came to your Web site many times.

Use this page to determine which times your Web site is busiest.

Daily averages cut off visits that continue into the next day, whereas weekly averages do not. Therefore, weekly averages may appear a bit longer than daily averages.

Visits Over Time

This page helps you understand the bandwidth requirements of your site by tracking visits over the course of the report period.

Time Interval - A one-year report displays monthly time increments. A one-quarter report displays weekly time increments. A one-month report or a one-week report displays daily time increments. A daily report displays hourly time increments. An hour-long interval marked 12:00, for example, includes all activity between 12:00 and 12:59.

Visits - Number of visits to your site during the specified time interval. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of visits to your site during the specified time interval compared with all visits to your site during the report period.

Periods of less activity can be considered good times for maintenance and content improvement.

Visitors by Number of Visits

This page shows the distribution of visitors based on how many times each visitor visited your site.

Visitors by Number of Visits		
Number of Visits	Unique Visitors	%
1 visit	5,235	83.64%
2 visits	487	7.78%
3 visits	175	2.80%
4 visits	79	1.26%
5 visits	54	0.86%
6 visits	35	0.56%
7 visits	28	0.45%
8 visits	20	0.32%
9 visits	7	0.11%
Subtotal	6,120	97.78%
Other	139	2.22%
Total	6,259	100.00%

Visitors by Number of Visits - Help Card

Number of Visits - The number of visits, beginning with one and increasing by increments of one, being analyzed in the other columns.

Unique Visitors - Number of unique individuals who came to your site the amount of times specified in the Number of Visits column.

% - Percentage of unique visitors who came to your site the amount of times specified in the Number of Visits column.

This information can indicate whether or not your site compels visitors to return. Updating Web site content is one way to draw return visitors.

Visitors by Number of Visits - Help Card

Summary of Activity for Report Period

This page summarizes general server activity.

Summary of Activity for Report Period	
Average Number of Visitors per day on Weekdays	389
Average Number of Hits per day on Weekdays	4,602
Average Number of Visitors per Weekend	504
Average Number of Hits per Weekend	3,499
Most Active Day of the Week	Wed
Least Active Day of the Week	Sat
Most Active Date	October 31, 2002
Number of Hits on Most Active Date	6,500
Least Active Date	October 19, 2002
Number of Hits on Least Active Date	1,006
Most Active Hour of the Day	09:00-09:59
Least Active Hour of the Day	00:00-00:59

Summary of Activity for Report Period - Help Card

Average Number of Hits (per day on weekdays) - The average number of hits for each individual day of the week.

Average Number of Hits (per weekend) - The average number of hits for both Saturdays and Sundays combined.

Average Number of Visitors (per day on weekdays) - The average number of visits for each individual day of the week.

Average Number of Visitors (per weekend) - The average number of visits for both Saturdays and Sundays combined.

Least Active Date - The least active date in the report period.

Least Active Day of the Week - If the report period is for one week or less, the Least Active Day of the Week will tell you which specific day was least active during that week. If the report period is for more than one week, the Least Active Day of the Week will tell you which day of the week that has the smallest amount of activity on average.

Least Active Hour of the Day - The least active hour of the day after activity for all hours is added up. This is not an average.

Most Active Date - The most active date in the report period.

Most Active Day of the Week - If the report period is for one week or less, the Most Active Day of the Week will tell you which specific day was most active during that week. If the report period is for more than one week, the Most Active Day of the Week will tell you which day of the week that has the largest amount of activity on average.

Most Active Hour of the Day - The most active hour of the day after activity for all hours is added up. This is not an average.

Visits by Number of Pages Viewed - Help Card

Visits by Number of Pages Viewed - Help Card

Number of Pages Viewed - The number of pages viewed during a visit. If the visitor viewed only non-page files such as a .gif or a .jpeg, the count of pages viewed is zero for that visit.

Visits - Number of visits by visitors who viewed the specified number of pages. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of total visits by people who viewed the specified number of pages.

You can use this information to quickly find out the number and percentages of viewers who read a given number of pages on your site. If most visitors only view a few pages, it may indicate that they can not find the content they are looking for.

Average Time to Serve Documents

This page displays the average amount of time it takes to serve pages classified as documents.

Average Time to Serve Documents				
Time Interval	Total Time to Serve	Documents Served	Average Time to Serve

Total	33,737,680	27,730	1,216.65

Average Time to Serve Documents - Help Card

Average Time to Serve - Average amount of time (in milliseconds) it took to serve each document during the specified time interval. The time to serve spans from the time the server got a page request until it transmitted all the data.

Documents - Pages defined as "documents" by the system administrator. Typically, a page will be defined as a document if the content is static, such as a complete HTML page. However, the administrator has the option of defining dynamic pages and forms as documents if he or she chooses.

Documents Served - Number of documents served to visitors during the specified time interval.

Time Interval - A one-year report displays monthly time increments. A one-quarter report displays weekly time increments. A one-month report or a one-week report displays daily time increments. A daily report displays hourly time increments. An hour-long interval marked 12:00, for example, includes all activity between 12:00 and 12:59.

Total Time to Serve - The total amount of time the server spent serving documents during the specified time interval.

Consider increasing your available bandwidth if the times to serve spike at rates disproportionate to the number of documents served during the same time interval. If you see this problem and have enough bandwidth, your server power may be a factor.

Visits by Day of the Week

This page shows the activity for each day of the week within the reporting period. Unsuccessful hits are not included.

Visits by Day of the Week		
Day	Visits	%
Sun	1,218	11.09%

Visits by Day of the Week - Help Card

Day - Specified day of the week being tracked.

Visits - Number of visits on the specified day of the week. If the report period is longer than one week, and there are, for example, two Mondays, the value represented includes the combined total of both Mondays. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of total visits that occurred on the specified day of the week.

Days of less activity should be considered good days for maintenance and content improvement.

Summary of Visits by Hour of the Day

Summary of Visits by Hour of the Day	
Most Active Hour of the Day	13:00-13:59
Least Active Hour of the Day	03:00-03:59

Visits by Hour of the Day - Help Card

Hour - Specified hour of the day being tracked. An hour-long interval marked 12:00, for example, includes all activity between 12:00 and 12:59.

Least Active Hour of the Day - The specific hour of the day that had the fewest number of visits.

Most Active Hour of the Day - The specific hour of the day that had the largest number of visits.

Visits - Number of visits to your site during the specified hour. If there are several days in the report period, the value presented is the sum of all visits during that hour for all days. All times are referenced to the location of the system running the analysis. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of visits to your site that occurred during the specified hour.

This information can be used to determine which hour of the day is best for system maintenance.

Hits by Hour of the Day

This page shows the most and the least active hour of the day for the report period. The second table breaks down activity for the given report period to show the average activity for each individual hour of the day. If there are several days in the report period, the value presented is the sum of all hits during that period of time for all days. All times are referenced to the location of the system running the analysis.

which file extensions qualify a file as a document. These settings can be changed by the Reporting Center system administrator. Any URL containing a question mark is considered a dynamic page. Any file with a POST command is considered a form.

Visit Duration (Minutes) - The number of minutes your Web site was viewed.

Views - A page view is A hit to any file classified as a page. Contrast page views with hits, which counts files of every type.

% - Percentage of page views for visitors who viewed your page for the specified duration of time.

This information tells you how many visitors view your site for specific intervals of time.

Technical Statistics and Analysis

This page shows the reliability of your Web site. The table shows the total number of hits for the site, how many hits were successful, how many hits failed, and the percentage of hits that failed.

Technical Statistics and Analysis	
Total Hits	121,287
Successful Hits	119,852
Failed Hits	1,435
Failed Hits as Percent	1.18%
Cached Hits	18,440
Cached Hits as Percent	15.20%

Technical Statistics and Analysis - Help Card
<p></p> <p>Cached Hits - Hits where the page was found in the cache of the browser, so the server did not need to transfer the file.</p> <p>Cached Hits as Percent - Percentage of hits that were cached compared with the total number of hits.</p> <p>Failed Hits - Number of hits where a server or client error occurred.</p> <p>Failed Hits as Percent - Percentage of hits where a server or client error occurred.</p> <p>Hits - Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.</p> <p>Successful Hits - Number of hits without a server or client error.</p> <p>Total Hits - Number of successful hits plus failed hits.</p> <p></p> <p>Use this information for a bird's-eye view of the reliability of your Web site. Many major problems can be revealed here.</p>

Dynamic Pages & Forms Errors

This page shows the number of successful form submissions and dynamic pages served compared to the number that failed.

Dynamic Pages & Forms Errors			
	Pages	Hits	%
1.	Successful Dynamic Pages & Forms	763	84.78%
2.	Failed Dynamic Pages & Forms	137	15.22%
	Total	900	100.00%

Dynamic Pages & Forms Errors - Help Card

?

Hits - Number of hits to the specified page. Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

Pages - This column lists dynamic pages and forms, but not documents. Different types of profiles have different default settings for which file extensions qualify a file as a document. These settings can be changed by the Reporting Center system administrator. Any URL containing a question mark is considered a dynamic page. Any file with a POST command is considered a form.

% - Percentage of hits to the specified page that were successful.

💡

This page helps determine the reliability of your site.

Client Errors

This page identifies the error codes from the browsers accessing your server.

Client Errors			
	HTTP Status Codes	Hits	%
1.	404 Not Found	1,325	93.18%
2.	403 Forbidden	72	5.06%
3.	406 Not Acceptable	19	1.34%
4.	401 Unauthorized	4	0.28%
5.	405 Method Not Allowed	2	0.14%
	Total	1,422	100.00%

Client Errors - Help Card

Client Errors - An error caused by a problem on your visitor's end of the Web site connection. The server is not responsible for client errors.

Hits - Number of failed hits that returned this status code.

HTTP Status Codes - The status code for the specific error that occurred.

% - Percentage of total failed hits that returned this status code.

Use this page to determine what maintenance is necessary.

File Not Found Errors

This page identifies files that returned "404 - Not Found" or "410 - Gone" errors from your server.

File Not Found Errors

column.

Referrals - Number of visitors referred to your site from the specified search engine who used the specified keywords in their search.

% - Percentage of visitors referred from search engines who used the specified search engine and keyword.

This information can give you an idea how your meta tags are performing with each search engine.

Top Search Phrases

The first table identifies search phrases which led the most visitors to your site, regardless of the search engine they used. The second table identifies, for each phrase, which search engines led visitors to the site.

Top Search Phrases - Help Card

Top Search Phrases Table

Phrases - The specific search phrases being analyzed. A search phrase is the entire search string entered by a visitor. It can include one or more keywords.

Referrals - Number of visitors referred to your site who used the specified search phrase, regardless of the search engine they used.

% - Percentage of referred visitors who used the specified search phrase.

Top Search Phrases with Engines Detail Table

Engines - Specific search engine being analyzed in conjunction with the phrase in the adjacent column.

Phrase - The search phrase being analyzed in conjunction with the search engine in the adjacent column. A search phrase is the entire search string entered by a visitor. It can include one or more keywords.

Referrals - Number of visitors referred to your site from the specified search engine who used the specified phrase in their search.

% - Percentage of visitors referred from search engines who used the specified search engine and phrase.

How are people getting to your site? Use these tables to find out if your visitors are using the search phrases you expect. Do you need to use different keywords in page titles to make it easier for people to find your site with search engines?

Top Search Keywords

The first table identifies keywords which led the most visitors to the site (regardless of the search engine). The second table identifies, for each keyword, which search engines led visitors to the site.

Top Search Keywords - Help Card

Top Search Keywords Table

Keywords - Specific keywords being analyzed. To see the entire search strings entered by visitors, see the Top Search Phrases page.

Referrers - Number of visitors referred to your site with the specified keywords.

% - Percentage of visitors referred to your site with keywords who were referred by the keywords specified.

Top Search Keywords Table with Engines Detail Table

Engines - Specific search engine being analyzed in conjunction with the keyword in the adjacent column.

Keywords - The keyword being analyzed in conjunction with the search engine in the adjacent column. To see the entire search strings entered by visitors, see the Top Search Phrases page.

Referrals - Number of visitors referred to your site from the specified search engine who used the specified keywords in their search.

% - Percentage of visitors referred from search engines who used the specified search engine and keyword.

At the most basic level, this section tells you which search engines are being used most frequently to find your site. You also may find that some search engines are referring visitors to your site with the keywords you expect and that other search engines are not.

Top Browsers by Visits

This page identifies the most popular browsers used by visitors to your site. This information will only be displayed if your server is logging the browser/platform information.

?

Top Browsers by Visits - Help Card

Browser - A program used to locate and view Web pages. These include Netscape, Mosaic, Microsoft Internet Explorer, and others.

Total - The total visits where there was sufficient information to identify the browser. This number may be less than the total visits overall.

Visits - Number of times a visitor with the specified browser came to your site. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of total visits by visitors using the specified browser.

Browser data can help you determine how to configure your site for optimal viewing.

Note: Any hits identified as originating from a spider (an automated program that searches the Internet) are not counted in this table. Also, if a browser does not identify itself in its request to the Web server, it will get counted on this page as an "Other."

Top Spiders by Hits Over Time - Help Card

?

Hits - Number of times the specified spider hit your site. Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

Spider - An automated program which searches the Internet.

% - Percentage of total spider hits by the specified spider.

💡

This information is important for a Webmaster trying to block spiders that tax the server. It also tells you what kind of automated attention you have attracted to your site.

Top Platforms by Visits

This page identifies the operating systems most used by the visitors to the site. This information will only be displayed if your server is logging the browser/platform information.

Top Platforms by Visits			
	Platform	Visits	%
1.	Windows 2000	3,176	32.99%
2.	Windows 98	3,148	32.70%
3.	Windows NT	1,052	10.93%
4.	Windows ME	970	10.07%
5.	Others	472	4.90%
6.	Macintosh PowerPC	417	4.33%
7.	Windows 95	370	3.84%
8.	Linux	13	0.14%
9.	OS/2	3	0.03%
10.	Windows Win32s	3	0.03%
11.	SunOS	3	0.03%
12.	Hewlett Packard Unix (HP9000)	1	0.01%
	Total	9,628	100.00%

Top Platforms by Visits - Help Card	
<p>?</p> <p>Platform - The specified platform being analyzed. The operating system used by the visitor to your site.</p> <p>Total - The total visits that were not identified as from a spider. This number may be less than the total visits overall.</p> <p>Visits - Number of visits by visitors using the specified platform. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.</p> <p>% - Percentage of visitors using the specified platform.</p>

Glossary

The following terms are used in Reporting Center reports, and some are used throughout the World Wide Web in general.

Glossary	
Ad	A graphic or banner which takes a visitor to another Web site when clicked.
Ad Click	A click on an advertisement which takes a visitor to another Web site.
Ad View	Occurs when an ad is displayed to a visitor. Once visitors have viewed an ad, they can click on it (see Ad Click). There may be more than one ad on an ad view.
Authenticated Username	A unique visitor tracked by user name and password rather than by IP address. You may find more authenticated user names than total visitors because several persons may be using the same IP address. Since many ISPs dynamically assign IP addresses, and since multiple visitors may use a single IP address, authentication is a much more accurate way to identify visitors.
Authentication	Technique that limits access to Internet or intranet resources to visitors who identify themselves by entering a user name and password.
Bandwidth	Measure of the traffic on a site. Bandwidth is expressed as the amount of data transferred in a specified unit of time.
Browser	A program used to locate and view Web pages. These include Netscape, Mosaic, Microsoft Internet Explorer, and others.
Click Through Rate	Percentage of visitors who viewed an ad and also clicked on it. This is a good indication of an ad's effectiveness.
Client	A computer that accesses resources provided by another computer, called a server.
Client Errors	An error occurring due to an invalid request by the visitor's browser. Client errors are in the 400-range. See the "Status Code" glossary entry for more information.
Company Database	The database installed and used by Reporting Center to look up the company name, city, state, and country corresponding to a specific domain name.
Cookies	Files containing information about Web site visitors. This information can include the visitor's user name, preferences, etc. The information is provided by visitors during their first visit to a Web site. The server records this information in a text file and stores it on the visitor's hard drive. At the beginning of later visits, the server looks for a cookie and configures itself based on the information provided.
Destination Page	A page chosen by the system administrator for Path Analysis. The Path Analysis pages track which clicks brought each visitor to the selected Destination Page.
Documents	Pages defined as "documents" by the system administrator. Typically, a page will be defined as a document if the content is static, such as a complete HTML page. However, the administrator has the option of defining dynamic pages and forms as documents if he or she chooses.
Domain Name	The text name corresponding to the IP address of a computer on the Internet. For example, www.webtrends.com is a domain name.
Domain Name Lookup	The process of converting an IP address into a text name (for example, 204.245.240.194 is converted to www.webtrends.com).
Dynamic Pages and Forms	Dynamic pages are generated dynamically based on values selected by a visitor. They are generated with variables, and do not exist anywhere in a static, predictable form. Reporting Center considers any URL containing options (with a question mark in the URL) a dynamic page. Any file with a POST command is considered a form.
Entry File	The first file requested by a visitor during a visit to your Web site.
Entry Page	The first page viewed during a visit to your Web site. If a visit consists only of hits to non-page files, that visit has no entry page. This can cause the total number of entry pages to be less than the total number of visits.

Glossary	
Exit Page	The last page viewed during a visit to your Web site. If a visit consists only of hits to non-page files, that visit has no exit page. This can cause the total number of exit pages to be less than the total number of visits.
FTP	File Transfer Protocol. It is a standard method of sending files from one computer to another over the Internet.
File Type	Identifies types of files by their file extension. For example, a file named graphic.gif is identified as type "gif."
Filters	A means of narrowing the scope of a report by specifying ranges or types of data to include or exclude.
Forms	Scripted pages which pass variables back to the server. These pages are used to gather information from visitors. Reporting Center counts any file with an HTTP POST command as a form.
GIF	Graphics Interchange Format. It is a graphics file format commonly used in HTML documents.
HTML	Hypertext Markup Language. It is the programming language for static Web pages. It usually includes hypertext links between related objects and documents.
HTTP	Hypertext Transfer Protocol. It is a standard method of transferring data between a Web server and a Web browser.
Hit	Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.
Home Page	The main or introductory page of a Web site. The home page provides visitors with an overview and links to the rest of the site. It often contains or links to a Table of Contents.
Home Page URL	The URL for the home page of the site analyzed in the report.
IP Address	Internet Protocol Address. It is a series of four one- to three-digit numbers separated by periods. It is used to identify a computer connected to the Internet. For example, 212.6.125.76 is an IP address.
JPEG	Joint Photographic Expert Group. It is a compressed graphics format common on the Internet.
Log File	A file created by a Web or proxy server which contains information about the activity of the server.
New Users	Visitors who didn't have a cookie on their first visit, but had one during later visits.
No Referrer	Indicates visits to your Web site that did not originate from any other site. For example, any visitor who types the URL of your site directly into their browser window fits into this category.
Other	In tables showing a variable-length list of items, the number of items may exceed the number that can be viewed at one time. The values for the items not currently shown are added together and shown in the row named "Other."
Page	Any document, dynamic page, or form. Different types of profiles have different default settings for which file extensions qualify a file as a document. These settings can be changed by the Reporting Center system administrator. Any URL containing a question mark is considered a dynamic page. Any file with a POST command is considered a form.
Page View	A hit to any file classified as a page. Contrast the value for "page views" with the value for "hits," which includes hits to files of every type.
Palm Browser	A program used on a Palm device to display site content, similar to Netscape or Internet Explorer on PCs.
Palm Device	A portable personal computer small enough to fit in the palm of a person's hand. Reporting Center reports only include Palm devices if the log files shows the device used a Palm browser.
Path Through Site	The sequence of pages a visitor views, from the entry page to the exit page and all pages in between.
Paths from Start	The sequence of pages a visitor views, excluding the entry page.
Paths to Destination	The sequence of pages a visitor views before arriving at a selected Destination Page.

Glossary	
Platform	Refers to the operating system, such as Linux or Windows 98.
Protocol	An established method of exchanging data over the Internet.
Referrer	URL of a Web page that refers visitors to your site.
Report Period	The dates covered in the report. You may select a report period of any day, week, month, quarter, or year within the data provided by the log analysis.
Returning Visitors	Visitors who already had a cookie from your site before they visited.
Script	A simple programming language used to execute specific or limited tasks. Scripts are often used for pages on the Internet to serve dynamic content and to tailor pages for individual visitors.
Server	A computer that hosts information available to anyone accessing the Internet or an internal intranet.
Server Error	An error occurring on the server. Web server errors have codes in the 500 range.
Single Access Page	A page on your Web site that visitors open, then exit from, without viewing any other page. To qualify, the visit must be to a page with a valid document type. If the visit is to a document with a different type (such as a graphic or sound file), the file does not count as a single access page, and the visit is not included in the total. Such visits are often the result of other sites referencing a specific downloadable file or graphic on your site. In these cases, a visit may have a single hit to a non-document type file, and will not be counted in the percentage calculations.
Spider	An automated program which searches the internet.
Status Code	<p>The HTTP status code of a file request specifies whether the transfer was successful or not, and why. These codes are defined in RFC 2616, section 6.1.1.</p> <p>"Success" codes:</p> <p>100 = Success: Continue 101 = Success: Switching Protocols 200 = Success: OK 201 = Success: Created 202 = Success: Accepted 203 = Success: Non-Authoritative Information 204 = Success: No Content 205 = Success: Reset Content 206 = Success: Partial Content 300 = Success: Multiple Choices 301 = Success: Moved Permanently 302 = Success: Found 303 = Success: See Other 304 = Success: Not Modified 305 = Success : Use Proxy 307 = Success : Temporary Redirect</p> <p>"Failed" codes:</p> <p>400 = Failed: Bad Request 401 = Failed: Unauthorized 402 = Failed: Payment Required 403 = Failed: Forbidden 404 = Failed: Not Found 405 = Failed: Method Not Allowed 406 = Failed: Not Acceptable 407 = Failed: Proxy Authentication Required 408 = Failed: Request Time-out 409 = Failed: Conflict 410 = Failed: Gone 411 = Failed: Length Required 412 = Failed: Precondition Failed</p>

Glossary	
	413 = Failed: Request Entity Too Large 414 = Failed: Request-URI Too Large 415 = Failed: Unsupported Media Type 416 = Failed: Requested range not satisfiable 417 = Failed: Expectation Failed 500 = Failed: Internal Server Error 501 = Failed: Not Implemented 502 = Failed: Bad Gateway 503 = Failed: Service Unavailable 504 = Failed: Gateway Time-out 505 = Failed: HTTP Version Not Supported
Subtotal	In tables showing a variable length list of items, the number of items may exceed the number that can be viewed at one time. The values for the items currently shown are added together and shown in the row named "Subtotal."
Suffix (Domain Name)	See "Top-Level Domain."
Time Interval	A one-year report displays monthly time increments. A one-quarter report displays weekly time increments. A one-month report or a one-week report displays daily time increments. A daily report displays hourly time increments. An hour-long interval marked 12:00, for example, includes all activity between 12:00 and 12:59.
Top-Level Domain	<p>The suffix of a domain name. A top-level domain can be based on the type of organization (.com, .edu, .museum, .name, etc) or it can be a country code (.uk, .de, .jp, .us, etc.). The top-level domain can be used to identify the type of web site. The following is a partial list of how this report categorizes top-level domains:</p> <p>ARPANET: .arpa</p> <p>Commercial: .com .co .com.[country code] .co.[country code] .firm.co .firm.ve .ltd.uk</p> <p>Education: .edu .edu.[country-code] .ed.[country code] .ac.[country code] .school.[country code] .k12.[country code] .re.kr .sch.uk .edunet.tn</p> <p>International: .int .int.co .int.ve .intl.tn</p> <p>Government: .gov .gov.[country code] .gove.[country code] .go.[country code]</p> <p>Military: .mil .mil.[country code]</p> <p>Network: .net .ad.jp .ne.kr .net.[country code]</p> <p>Organization: .org .or .org.[country code] .or.[country code]</p>
Total	This table row gives the sum of all of the items for the current table during this report period. If the number of items for the table exceeds the number that can be viewed at one time, then a "Subtotal" row and an "Other" row will also be provided, and their sum will equal the Total row.
Traffic	The quantity of data transferred.
URL	Uniform Resource Locator. It is a means of identifying an exact location on the Internet. For example, http://www.webtrends.com/html/info/default.htm is the URL which defines the location of the page Default.htm in the /html/info/ directory on the NetIQ Corporation Web site. As the previous example shows, a URL is comprised of four parts: Protocol Type (HTTP), Machine Name (webtrends.com), Directory Path (/html/info/), and File Name (default.htm).
Unique Visitors	Individuals who visited your site during the report period. If someone visits more than once, they are counted only the first time they visit.
User Agent	Portion of a log file that identifies the browser and platform used by a visitor.
Users Without Cookies	Visitors who come to your site with cookies disabled. There is no way to determine if these visitors are new or returning.

Glossary	
Visit	A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.
Visit Duration (Minutes)	The number of minutes your Web site was viewed by a visitor.
Visitor Minutes	Total number of minutes your site was viewed by all visitors during the report period.
Visits With Clicks	Visits to your site where at least one ad was clicked on.
WAP Browser	A program used on a WAP device to display site content, similar to Netscape or Internet Explorer on PCs.
WAP Carrier	A server that acts as an intermediary and relays requests from visitors with WAP devices to your site.
WAP Device	A wireless device using Wireless Application Protocol (WAP), such as a cellular telephone or radio transceiver, that can be used to access the Internet. Reporting Center reports only include WAP devices if the log file shows the device used a WAP browser.
WTLS	Acronym for Wireless Transport Layer Security protocol, which is the security layer endorsed by the WAP Forum (www.wapforum.org). Its primary goal is to provide privacy, data integrity, and authentication for WAP applications.
